

Groundbreaking UNPLUGGED technology

MARTIN AUDIO
L O N D O N

A Unique Intersection of Sonic Experience and Environmental Responsibility

**The world's most powerful UNPLUGGED
Eco-Friendly VW style DJ stage...**

Party Responsibly

Built with sustainability at its heart, the fibreglass Supersized Bug is a trailer (so no engines) and 30% larger than a standard VW Camper - Huge visual impact!

The custom built Martin Audio sound system runs entirely on renewables from a rack mounted 'Power Tower' and topped up by solar. Pumping upto 16 hours of non stop sound for 500+ capacity crowds.

The ultimate eco-friendly 'off-grid' solution, delivering zero emissions. The perfect rechargeable battery replacement for noisy polluting generators.

This way you can rest easy knowing you've partied to the max, but also responsibly!

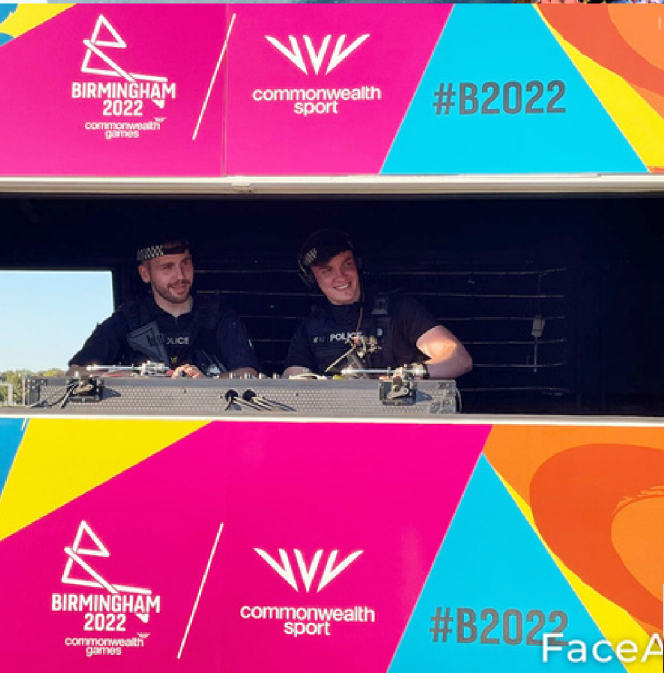

- Custom designed Martin Audio 15" 3-way high performance THS loudspeakers, double 15" direct radiating SX215 subwoofers - Highly efficient powerful IKON 81 amplifiers.
- Tower power "off grid battery" supply (upto 16 hours)
- Recharged by solar panels
- Pioneer DJ equipment
- Pro lighting, built to spec
- Sound technicians
- Top quality DJs (or DIY)
- Add your design with 'Brand-a-Bug' Illuminated lightbox and vinyl wrap service.

Personalise with your own branding design, full vinyl wraps & lightbox

WE THINK GREEN

We love planet Earth and are taking huge steps to make sure we are environmentally friendly

LIGHT WEIGHT & ECONOMICAL

Our fleet of Bugs are trailers, modelled on the classic we all know and love

UNPLUGGED TECHNOLOGY

Powered by custom built, recycled EV rechargeable battery system. Off grid!

PARTY RESPONSIBLY

State of the art custom built Martin Audio sound system powered by renewables

Positive impact

Set up in 2013, The Bug Club have delivered their VW style DJ booth 'Bugs' to over 700 events from festivals, to brand activations, sporting events to street parties. Major events include Formula 1, The Commonwealth Games, Latitude and Bestival as well as working with brands including VW, BrewDog and Deliveroo.

Since 1971, Martin Audio has been designing and manufacturing leading professional sound systems for clubs, festivals and touring bands. Today, such systems can be found on Glastonbury Pyramid Stage, British Summer Time Hyde Park concerts, Ministry of Sound and on tour with The Killers and Stereophonics.
